

Managing Indoor Environmental Quality (IEQ) Leads to Green and Healthy Schools

Healthy School Environments Across the South

Hear from regional school district representatives and national IEQ experts on:

- Implementing proactive IEQ management actions to protect student and staff health.
- Making the connection between healthy buildings and academic achievement.
- Conducting thorough school walkthroughs to identify and address indoor air quality issues.
- Controlling indoor pollutants, such as mold and moisture, pesticides and other asthma triggers.
- Getting buy-in from the school community, leveraging existing assets and securing sustainable funding for long-term success.

FREE Training!
February 23, 2012
Athens, GA

How can your district make green and healthy school buildings a priority? What are school districts across the south doing to save money, improve health, and decrease student and staff absenteeism through simple, low-cost actions? Discover the answers to these questions and more by attending this free training. Bring members of your school community (including facility and maintenance staff, nurses, teachers, administrators, etc.), and learn how to work together as a team to create green and healthy schools.
